As a professional over the road driver I depend upon current and accurate news, weather and traffic reports on a day to day basis. XM radio provides that service. It is the only media that can be accessed in virtually every area of the country. My trip planning is greatly affected by this information. The safety of myself and my rig depend upon this information. To restrict this type of programming from XM Radio through the bill HR 4026 would be devastating. Please do not allow this to happen. Sincerely, Jeffery E. Johnson
